To whom it may concern:

I have been shopping at Sobeys' Stores on a regular basis for many years. In the last few years, I have become very disturbed about the amount of plastic packaging used in the stores where I buy groceries. Recently I have learned that much of this plastic cannot be recycled. Like many, I am deeply concerned about the impact of all this plastic waste on the environment – especially on the oceans.

I would like to know what the Empire Corporation is planning to do to reduce plastic packaging in grocery stores. I urge you, for the sake of the planet and all living things on the Earth, to stop using so much plastic; to provide alternative, biodegradable packaging.

Thank you for taking the time to read this letter and for taking action to address this serious issue. I look forward to hearing what actions you plan to take.

Respectfully,
